

React Native Mini Project Assignment

Project: Smart Field Survey & Inspection App

Objective: Build a complete React Native application using Expo APIs (Camera, Contacts, Location, Clipboard) with Expo Router, Bottom Tabs, Drawer Navigation, reusable components, and a modern UI.

Module 1 - Dashboard

- Welcome Screen
- Student Details
- Today's Survey Count
- Quick Action Cards
- Custom App Header
- Recent Survey Summary

Module 2 - Create Survey

- Site Name
- Client Name
- Description
- Priority
- Date
- Validate Required Fields

Module 3 - Camera

- Request Permission
- Capture Photo
- Preview Image
- Display Capture Time
- Retake Photo
- Delete Photo
- Confirmation Alert Before Delete
- Loading Indicator While Opening Camera

Module 4 - Location

- Request Permission
- Display Latitude & Longitude
- Display Accuracy
- Refresh Location
- Copy Current Location to Clipboard
- Success Alert After Copy

Module 5 - Contacts

- Request Permission
- Fetch Contacts
- Search Contacts
- Contact Counter
- Pull-to-Refresh
- Contact Avatar (Initial)
- Copy Contact Number
- Display 'No Number' if unavailable

- Empty State Screen

Module 6 - Clipboard

- Copy Survey ID
- Copy Contact Number
- Copy Current Location
- Paste Notes
- Clear Clipboard Data

Module 7 - Survey Preview

- Display Site Details, Client, Photo, Contact, Location and Notes
- Edit Survey
- Submit Survey

Module 8 - Survey History

- Display Surveys using FlatList
- View Survey Details
- Search Survey History
- Filter by Priority
- Delete Survey with Confirmation

Navigation

Bottom Tabs: Dashboard, New Survey, History, Profile

Drawer: Dashboard, Survey, Camera, Contacts, Location, Clipboard, Settings

React Native Concepts

View, Text, Image, Button, Pressable, FlatList, ScrollView, TextInput, Alert, ActivityIndicator, RefreshControl, useState, useEffect, StyleSheet.

Expo APIs

expo-camera, expo-contacts, expo-location, expo-clipboard
